Email: mattias.johannesson@sick.com

Mattias Johannesson holds the title “Expert, 3D Vision” within the research and development of the German company SICK. He has over 20 years of experience with 3D camera development, with the first product Ranger released by IVP in 1993. The 3D camera development was a major part of his Ph.D. from Linköping University in 1995, and he has more than five patents in the machine vision field. He has worked since 1998 at IVP/SICK in Sweden and the USA.
