David Dechow is a staff engineer with FANUC America Corporation and has worked in the field of machine vision for over 30 years as a programmer, engineer, corporate manager and entrepreneur. He has personally implemented hundreds of vision systems for companies in a variety of industries.

Prior to FANUC, Mr. Dechow was founder and president of Aptúra Machine Vision Solutions.

He is a former member of the AIA board of directors, having served for over 14 years, with two terms as president of the board. Mr. Dechow lectures on machine vision technology and integration at many conference events and is a regular contributor of machine vision articles in trade journals and magazines. He has served on the editorial board of Vision Systems Design magazine and the editorial advisory board of Vision & Sensors magazine. Mr. Dechow was the 2007 recipient of the AIA Achievement Award for career achievements in industrial and/or scientific imaging.
