Dr. Shabbir Bambot earned a Ph.D. in Chemical Engineering from the University of Pittsburgh and is an expert in the field of spectroscopy and bio-photonics. He has been instrumental in the successful launch of multiple point-of-care medical diagnostic products: the OPTI 2® blood chemistry analyzer at AVL/Roche, the BiliChek® Non-invasive Bilirubin Analyzer at SpectRx Inc., and the LuViva® advanced cervical scan at Guided Therapeutics Inc. (ticker: GTHP). He has co-founded two medical device companies, Guided Therapeutics and LumaMed, and has raised over \$20 Million for developing and launching cancer diagnosis and imaging products of which over \$14.0 Million was in non-dilutive capital from NIH SBIR grants and corporate partnerships. He is a named inventor on nine issued U.S. patents.
